PROFESSIONAL EXPERIENCE

Software Developer,

09/2024 – present | Navi Mumbai, India

Asian Exporters' Chamber of Commerce and Industry (AECCI)

As a Java Developer at the Asian Exporters Chamber, I build secure, scalable applications using Java 21, JWT authentication, and AWS. I have hands-on experience with MongoDB and MySQL for efficient database management. My expertise includes developing robust APIs, ensuring secure data flow, and optimizing performance. I also develop mobile apps using Flutter for Android and iOS. Additionally, I have designed e-commerce websites using HTML, CSS, JavaScript, jQuery, and Bootstrap, enhancing user experience and functionality.

Software Engineer, Jtronix Technologies

03/2023 – 04/2024 | Navi Mumbai, India

Developed and maintained web applications using Spring Boot, Hibernate, and Microservices architecture, ensuring scalability and performance. Contributed to frontend development with ReactJS to enhance user experience and interface responsiveness.

Implemented Docker for application containerization, optimizing deployment workflows and improving system reliability. Actively participated in code reviews, debugging, and troubleshooting, leading to improved application functionality and performance.

EDUCATION

Degree in Bachelor of Science in Information Technology, University of Mumbai

06/2019 – 03/2022 | Navi Mumbai, India

Commerce Higher Secondary School, Maharashtra Board

03/2018 – 04/2019 | Navi Mumbai, India

SKILLS

Programming Languages:

Core Java, Advanced Java, Java SE 8, Spring Boot (REST API), Collections Framework, Hibernate, and Web Services.

Libraries/Frameworks

CSS, Bootstrap, JavaScript, React.js, and Flutter.

Tools / Platforms

Git, GitHub, CI/CD Pipelines, and Containerization using Docker and AWS.

Databases

MySQL, SQL/NoSQL, and MongoDB.

PROJECTS

AgriculturePortal, A Secure and Scalable Marketplace for Farmers and Buyers

Secure farmer and buyer registration with token-based authentication. Developed product catalog management with add, update, and delete features. Integrated search and filter functionalities for easy product discovery. Implemented an order management system for tracking purchases. Designed a scalable architecture to handle growing user activity and data. Collaborated with teams to ensure quality, performance, and security. Demonstrated expertise in full-stack development, authentication, and database management.

Voting App, A Secure and Scalable Online Voting System

Developed a secure backend with Spring Boot, Maven, and JWT authentication, implemented role-based access control (RBAC) for data security, designed a scalable database for efficient voter and election data management, built a responsive frontend using React.js for a seamless user experience, enabled real-time vote counting with optimized API performance, and ensured end-to-end security with encryption and secure API communication.

CERTIFICATES

Advanced Program in Java Full Stack Development using Angular

Successfully completed the Java Full Stack Development program by Anudip Foundation and Mettl. Gained expertise in Angular, REST API integration, SQL, and Spring Boot, along with strong front-end and back-end development skills. Covered Agile methodologies and full-stack application design.

DevOps Certification in Docker, Kubernetes, and Terraform

Successfully completed the DevOps certification from The Digital Adda, covering Docker, Kubernetes, and Terraform. Validates expertise in containerization, orchestration, and infrastructure as code (IaC) for scalable deployments.
